

Overview for Employers

What is CMx Workmed ?

CMx Workmed is an online platform that facilitates workplace and pre-employment medical exams by streamlining the entire experience for clinics, employers, and their employees/candidates.

If your preferred clinic is using CMx Workmed, you book a medical exam the same way as usual – but you must provide the clinic with the candidate's **date of birth** and **mobile number** or email address.

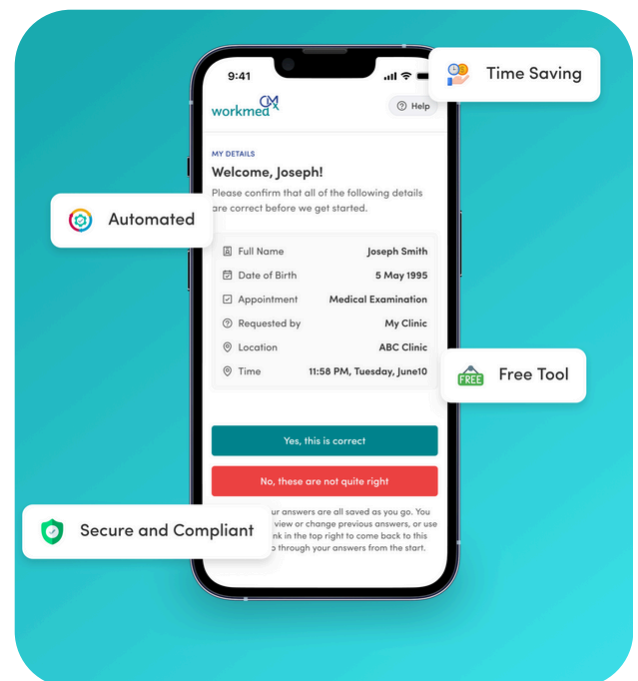

What do my Candidates/Employees see?

Once booked, your candidate will receive an SMS or email with:

- A link to their online smartphone-based health survey.
- Details on the clinic address, appointment date, and time.
- Instructions to bring photo ID.

When logging in to their health survey from their phone, they'll be asked to provide their name & date of birth to verify their identity

The survey will confirm their details, ask them some questions, obtain a signature on their touch screen, and also give them any final instructions such as bringing glasses if needed. Everything should be filled in before the candidate attends the clinic.

What do I see as the Employer ?

Your preferred clinic will add your business as a client in cmxWorkmed. Using an email address that you provide to the clinic, an email will be sent to you to set a password so you can access CMx Workmed secure online portal. This only needs to happen once.

That same email address will receive notifications when bookings are made, changed, or cancelled. An email will also be sent when a candidate's medical report is ready to be downloaded from CMx Workmed secure online portal. You can log in to this portal with the same email address and password you set earlier, to safely download the medical reports as PDF files
